

# PURPLE COW INDICANJA™

Purple Cow IndiCanja™ is a scientifically formulated and tested natural and organic fertilizing package that contains the necessary minerals, nutrients and fertility for all stages of plant growth, from young seedlings in a vegetative phase through transplanting, budding and flowering, and the final hardening phase.

## GUARANTEED ANALYSIS 0.8-0.8-0.8

Total Nitrogen (N)	0.8%
1.0% Water Insoluble Nitrogen*	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	0.8%
Soluble Potash (K <sub>2</sub> O)	0.8%
Calcium (Ca)	2.0%

\*1.0% Slowly available nitrogen from compost

### DERIVED FROM:

Aerobically composted poultry litter, kelp meal (*ascophyllum nodosum*), bone meal, sulfate of potash, calcium sulfate dihydrate and volcanic ash

### INGREDIENTS:

Compost (leaves), perlite, sphagnum peat moss and fertilizer

ORGANIC

## USE RECOMMENDATIONS

### VEGETATIVE PHASE

Plant seedling or rooted cutting directly into Purple Cow IndiCanja™.

Gently tamp soil towards the edges of the container, away from the root system. Tamping medium toward the root system could potentially damage roots and cause transplant shock. Allow water to fill the soil in around the newly-transplanted root stock.

Water until saturated. Note: overwatering until water is excessively dripping out of the container can result in loss of fertility from the soil medium.

Wait for soil to dry at least 50% before watering again.

### FLOWERING PHASE

Choose a container that is a minimum of 3-4 times larger than the container the plant has been growing in during the Vegetative Phase.

Transplant approximately 7-10 days before inducing flowering.

Remove plant from Vegetative Phase container and place plant's root system gently onto new soil.

Pour in Purple Cow IndiCanja™ and gently tamp soil around perimeter of root system and toward container.

Water around the freshly transplanted root system in the new material until saturated.

Wait for soil medium to dry at least 50% before watering again.

## WHAT MAKES IT DIFFERENT?

- Purple Cow IndiCanja™ is a nutrient-dense growing material for home gardeners and hobby and commercial growers.
- It supports the goal of cultivating "cleanly" grown flowers and extracted compounds for human consumption, whether inhaled or ingested.
- It's easy! Purple Cow IndiCanja™ is natural and organic and "ready-to-use" requiring no further work.
- IndiCanja™ contains essential plant nutrients and beneficial organic matter that may naturally increase the plants' uptake of nutrients and water.
- Developed by a grower for growers.
