

SALT-B-GONE™

ADVANTAGES:

Salt-B-Gone™ is designed to reduce salinity in soil. It creates a better environment that helps condition the soil for improved plant performance and vigor. Frequent application of dry minerals and lime can create soil compactions and pH instability. During and after this treatment, avoid applying other high-salt-based fertilizer products.

APPLICATION:

See tech Data Sheet for additional application for high or low soil pH application programs. This product may be used on many different crops. Rate information provided is a range and not specific to one crop.

See Tech Data Sheet for additional information.

EASE OF USE:

- Fast-acting and maximum absorbency.
- Can be mixed with various liquid fertilizers formulations.
- Can be applied through irrigation systems or fertigated through sprinkler systems.
- 100% water soluble and bio-available.
- Easy to handle and tank mix for foliar application.

USE RATES: REMEDIATION:

Best results come from obtaining a soil test to find out current soil salinity (ppm). Maintain soil moisture, if possible, throughout the year. Use PHXR to adjust water, use 6-8 fl oz per acre. Keeping between 5.5-6.5 for best results.

2 quarts per acre

Above average salt areas

1-2 gallons per acre in “dead zones” with 15-20 gallons of water per acre.

Rates can be changed based on the response to the program.

Normal to above average soil salinity:

- Maintaining correct soil salinity.
- Use 1-2 Quarts per acre with 10-15 gallons of water, applied either in Fall or during planting.

Soil test must be determined before application. This product may be used on many different crops. Rate information provided is a range and not specific to one crop. Application rates may vary based on type of soil, soil condition, soil testing, climate, and seed type. When mixing with other fertilizer products, it is always recommended to perform a jar test to ensure compatibility. For more specific application rate per acre, please contact your distributor for details.

STORAGE AND HANDLING

Keep container closed when not in use. Store this product inside at room temperature. 12-14 or more months in same container kept at temperature between 45°F-90°F.

CAUTION

Keep product away from eyes. Do not swallow or ingest this product. It is recommended that safety glasses or other protective eye wear be worn to prevent eye contact. The use of rubber, neoprene, nitrite, or other protective gloves is recommended where prolonged or extensive use is expected. Remove contaminated clothing and DO NOT wear again until thoroughly cleaned. Wash hands thoroughly with soap and water after handling.

FIRST AID

EYES: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if irritation persists.

SKIN: Flush affected area with plenty of water. Consult a physician if irritation develops.

INGESTION: If this product is swallowed do not induce vomiting. If vomiting occurs, keep head below hips to prevent aspiration (breathing) of liquid into the lungs. Get emergency medical attention immediately.

CONDITIONS OF SALE

Always follow all label directions. The manufacturer cannot control weather conditions, methods of application or the condition of the crop at time of application. Buyer assumes all risks of use, storage, or handling of this product when used in a manner inconsistent with label directions.
